

What About Creation #12

Creation...Evolution...So What?

Science is the intellectual and practical activity encompassing the systematic study of the structure and behavior of the physical and natural world through observation and experiment

Evolution is 1. the process by which different kinds of living organisms are thought to have developed and diversified from earlier forms during the history of the earth. 2. the gradual development of something, esp. from a simple to a more complex form

Faith is 1. complete trust or confidence in someone or something. 2. strong belief in God or in the doctrines of a religion, based on spiritual apprehension rather than proof.

Creation is 1. the action or process of bringing something into existence 2. the bringing into of existence of the universe, esp. when regarded as an act of God.
